# Information on the local elections in Garching

On March 8, 2026, the **Bürgermeister** (mayor) and **Stadtrat** (city council) of **Garching**, the **Landrat** (district administrator) and **Kreistag** (district council) of the **Landkreis München** will be elected.

The elections for the **Bürgermeister** and the **Landrat** are simple: after choosing one of the candidates, place a cross next to their name on the ballot paper.

For the election of the **Stadtrat** you have **24 votes** at your disposal: use them all!

For the election of the **Kreisrat** you have **70 votes** available: use them all!

## 1 You want to vote for a complete list

In this case, place a cross in the circle to the left of the name of the chosen party (only one party!): your 24 (Stadtrat) or 70 (Kreistag) votes will automatically be allocated to this party and its candidates.

## 2 You want to distribute your votes among the candidates on the chosen list

To do this, place a cross in the circle to the left of the name of the chosen party. This party will receive 24 (Stadtrat) or 70 (Kreistag) votes.
You can now give certain candidates of the party 1, 2, or 3 votes and also delete some candidates. Three votes for a candidate is the maximum. Write the number of your choice in the box in front of the candidate. The remaining votes on the ballot will be distributed among the remaining candidates, starting from the top and working down.

## 3 In addition to a list, you want to vote for individual candidates from other lists

In this case, first place a cross in the circle to the left of the name of the party you have chosen, which will receive all votes not assigned individually. Then write the desired number of votes next to the candidates from other parties, assigning a maximum of 3 votes to each candidate and a total of 24 (Stadtrat) or 70 (Kreistag) votes.

## 4 You want to distribute your votes freely among individual candidates from different lists

To do this, write the number of votes 1, 2, or 3 in the boxes in front of the candidates of your choice, taking care not to exceed the total of 24 (Stadtrat) or 70 (Kreistag), otherwise you will invalidate the entire ballot.

Candidate 1 of party C can also have a maximum of 3 votes, otherwise the vote will be invalid and lost.

**SO DON'T FORGET: by placing a cross in the circle to the left of a party name (and only in this position), you are giving that party all the votes you have not given to individual candidates from other parties.**
